

PREMOB

PREVENTING THE LOSS OF MOBILITY AND FALLS IN THE ELDERLY

TARGETED PATHOLOGY (IES)

Falls & Loss of mobility in the Elderly:

- Prevention & care
- Causes and risk factors (musculoskeletal disorders, cognitive, neurological and visual impairments, denutrition etc....).

METHODOLOGY / RESOURCES

- Inter-regional Geriatric Group (PIRG)
- Inter-regional network of hospitals & Nursing homes
- Multidisciplinary expertise (from lab to the patient care unit)
- Wide range of programs: from fall prevention to the management of fall-related consequences in nursing homes, hospitals and patients' homes.

INDUSTRY / PARTNERS

Biotechnology, Pharmaceutical & Medical Device Companies, public or private organizations:
Contact us so we could initiate our collaboration!

ACTIVE PATIENT POPULATION

Falls are a major health problem for the entire ageing population. On average, our geriatric departments register approximately 4000 fallers/year.

PARTNER DEPARTMENTS

University and hospital Research Units (methodology, epidemiology, technical support and expertise, imaging), Clinical Research Units (CIC), Biomechanics and bioengineering Lab, Longevity research center etc.

MEMBERS

Geriatric units

- University hospitals of the North-West inter-Region AMIENS/ CAEN/ LILLE/ ROUEN.
- Public hospital centers and private non-profit hospital groups of the North-West inter-Region.

Non-geriatric units & research labs

- Movement analysis, Walking disorders assessment and Rehabilitation units, Neurophysiology, Mobility, Disability and Ageing units and labs, Living lab for usability testing...
